INDEX TO AUTHORS

A

Allen, Willard M., and **Viergiver, Ellenmae.** A titrimetric method for the determination of sodium pregnanediol glucuronidate in the urine of pregnant women, 837

Almquist, H. J., Mecchi, E., and **Kratzer, F. H.** Creatine formation in the chick, 365

Axelrod, A. E. See *Katzenelbogen, Axelrod, and Elvehjem*, 611

B

Barborka, Clifford J. See *Friedemann and Barborka*, 993

Barker, H. A., and **Beck, J. V.** The fermentative decomposition of purines by *Clostridium acidi-urici* and *Clostridium cylindrosporum*, 3

Barron, E. S. Guzman, Goldinger, J. M., Lipton, M. A., and **Lyman, Carl M.** Studies on biological oxidations. XVII. The effect of thiamine on the metabolism of α-ketoglutarate, 975

—and **Lyman, Carl M.** Studies on biological oxidations. XV. The rates of reduction of thiamine and diphosphothiamine, 951

—, —, **Lipton, M. A.**, and **Goldinger, J. M.** Studies on biological oxidations. XVI. The effect of thiamine on condensation reactions of pyruvate, 957

Bauld, W. S. See *Heard, Bauld, and Hoffman*, 709

Baumberger, J. Percy. See *Horowitz and Baumberger*, 407

Baxter, J. G., Harris, P. L., Hickman, K. C. D., and **Robeson, C. D.** Noncrystallizable vitamin A, 991

Beck, J. V. See *Barker and Beck*, 3

Behrens, Otto K. Coenzymes for glyoxalase, 503

—. Preparation of *l*-alanine from *dl*-alanine by the action of *d*-amino acid oxidase, 465

Bennett, Mary Adelia. The replaceability of *dl*-methionine in the diet of the albino rat with *dl*-methionine sulfone and *dl*-methionine methylsulfonium chloride, 573

Berg, Clarence P. See *Sharp and Berg*, 739

Bergmann, Max. See *Fruton, Irving, and Bergmann*, 763

Bergström, Sune, and **Wintersteiner, O.** Autoxidation of sterols in colloidal aqueous solution. The nature of the products formed from cholesterol, 597

Bloor, W. R. See *Oleson and Bloor*, 349

Bohonos, N. See *Hutchings, Bohonos, and Peterson*, 521

Bonsnes, Roy W. See *du Vigneaud, Brown, and Bonsnes*, 707

Borek, Ernest, and **Waelsch, Heinrich.** Metabolism of methionine and its derivatives with tissue slices, 99

Borsook, Henry, and **Dubnoff, Jacob W.** The conversion of citrulline to arginine in kidney, 717

Bott, P. A., and **Richards, A. N.** The passage of protein molecules through the glomerular membranes, 291

Bowman, Donald E. Factors which greatly increase the activity of the phenolic hydroxyl group of *l*-tyrosine, 877

Brand, Erwin, and **Kassell, Beatrice.** Absence of methionine in crystalline horse serum albumin, 999

Brand, Florence C., and **Sperry, Warren M.** The determination of cerebrosides, 545

Brown, George Bosworth, and **du Vigneaud, Vincent.** The effect of certain reagents on the activity of biotin, 85

—. See *du Vigneaud, Brown, and Bonsnes,* 707

Bueding, Ernest, and **Goldfarb, Walter.** The effect of sodium fluoride and sodium iodoacetate on glycolysis in human blood, 539

— and **Goodhart, Robert.** Removal of pyruvic acid from human blood *in vitro,* 931

Buhs, Rudolf P. See *Scudi and Buhs,* 451

C

Carne, Herbert O. See *MacKay, Carne, Wick, and Visscher,* 889

Chaikoff, I. L. See *Fishler, Taurog, Perlman, and Chaikoff,* 809

—. See *Fries and Chaikoff,* 469, 479

Christensen, Halvor N., Edwards, Raymond R., and **Piersma, Henry D.** The composition of gramicidin and tyrocidine, 187

Clarke, Delphine H. See *Ralli, Clarke, and Kennedy,* 105

Clarke, F. T., and Mazur, Abraham. The lipids of diatoms, 283

Conn, John B. See *Tishler, Stokes, Tenner, and Conn,* 197

Craig, Lyman C., and **Jacobs, Walter A.** The veratrine alkaloids. XII. Further studies on the oxidation of cevine, 253

—. See *Jacobs and Craig,* 67

Craig, Lyman C. See *Jacobs, Craig, and Lavin,* 51

D

Dakin, H. D. On methylaspartic acids and their methylation, 945

Dann, W. J. The synthesis of nicotinic acid by the rat, 803

Deutsch, H. F., Kline, B. E., and **Rusch, H. P.** The oxidation of phospholipids in the presence of ascorbic acid and carcinogenic chemicals, 529

Dillon, Robert T. See *Van Slyke, Dillon, MacFadyen, and Hamilton,* 627

Dubnoff, Jacob W. A micromethod for the determination of arginine, 711

—. See *Borsook and Dubnoff,* 717

Dubos, René J. See *Hotchkiss and Dubos,* 155

—. See *Lipmann, Hotchkiss, and Dubos,* 163

E

Edwards, Raymond R. See *Christensen, Edwards, and Piersma,* 187

Egaña, Enrique, and **Melklejohn, Arnold P.** The estimation of thiamine in urine, 859

Eisenman, Anna J. See *Smith, Eisenman, and Winkler,* 555

Ellis, Fred W., and **Krantz, John C., Jr.** Sugar alcohols. XXII. Metabolism and toxicity studies with mannitol and sorbitol in man and animals, 147

Ells, Victor R. See *Uber and Ells,* 229

Elvehjem, C. A. See *Katzenelbogen, Axelrod, and Elvehjem,* 611

Evans, E. A., Jr., and **Slotin, Louis.** Carbon dioxide utilization by pigeon liver, 439

F

Fassina, R. J. See *Sinclair and Fassina*, 509

Fishler, M. C., Taurog, Alvin, Perlman, I., and **Chaikoff, I. L.** The synthesis and breakdown of liver phospholipid *in vitro* with radioactive phosphorus as indicator, 809

Fiske, Cyrus H. See *Hitchings and Fiske*, 827

Friedemann, Theodore E., and **Barborka, Clifford J.** The significance of the ratio of lactic to pyruvic acid in the blood after exercise, 993

Fries, B. A., and **Chaikoff, I. L.** Factors influencing recovery of injected labeled phosphorus in various organs of the rat, 469

— and —. The phosphorus metabolism of the brain as measured with radioactive phosphorus, 479

Fruton, Joseph S., Irving, George W., Jr., and **Bergmann, Max.** On the proteolytic enzymes of animal tissues. III. The proteolytic enzymes of beef spleen, beef kidney, and swine kidney. Classification of the cathepsins, 763

G

Gailey, Franklin B., and **Johnson, Marvin J.** The dipeptidases of intestinal mucosa, 921

Gavin, Gertrude, and **McHenry, E. W.** The effects of biotin upon fat synthesis and metabolism, 619

Goldfarb, Walter. See *Bueding and Goldfarb*, 539

Goldinger, J. M. See *Barron, Goldinger, Lipton, and Lyman*, 975

—. See *Barron, Lyman, Lipton, and Goldinger*, 957

—. See *Stare, Lipton, and Goldinger*, 981

Goodhart, Robert. See *Bueding and Goodhart*, 931

Greenstein, Jesse P., Jenrette, Wendell V., and **White, Julius.** The liver catalase activity of tumor-bearing rats and the effect of extirpation of the tumors, 327

Greenwald, Isidor. The dissociation of calcium and magnesium carbonates and bicarbonates, 789

Gunsalus, I. C., and **Hand, David B.** The use of bacteria in the chemical determination of total vitamin C, 853

H

Hamilton, Paul. See *Van Slyke, Dillon, MacFadyen, and Hamilton*, 627

—. See *Van Slyke, MacFadyen, and Hamilton*, 671

Hand, David B. See *Gunsalus and Hand*, 853

Harris, J. S., and **Kohn, Henry I.** The effect of purines on the action of sulfonamides, 989

Harris, John E. The influence of the metabolism of human erythrocytes on their potassium content, 579

Harris, P. L. See *Baxter, Harris, Hickman, and Robeson*, 991

Haven, Frances L., and **Levy, Sylvia Ruth.** The occurrence and rate of turnover of tumor sphingomyelin, 417

Heard, R. D. H., Bauld, W. S., and **Hoffman, M. M.** Steroids. V. α-Estradiol and progesterone metabolism, 709

— and **Hoffman, M. M.** Steroids. IV. The fate in man of injected α-estradiol, 329

Hershberg, E. B., and **Wolfe, John K.** A rapid extractor for urinary steroids. II. Modifications for the simultaneous hydrolysis and extraction of urine with any solvent heavier than water, 215

Hessel, F. H. See *Scott, Randall, and Hessel*, 325
Hickman, K. C. D. See *Baxter, Harris, Hickman, and Robeson*, 991
Hiller, Alma. See *Van Slyke, Hiller, and MacFadyen*, 681
Hitchings, George H., and **Fiske, Cyrus H.** The estimation of adenine, 827
Hoffman, M. M. See *Heard, Bauld, and Hoffman*, 709
—. See *Heard and Hoffman*, 329
Hofmann, Klaus, Melville, Donald B., and **du Vigneaud, Vincent.** Characterization of the functional groups of biotin, 207
Horowitz, N. H., and **Baumberger, J. Percy.** Studies on the respiratory pigment of *Urechis* eggs, 407
Hotchkiss, Rollin D. The chemical nature of gramicidin and tyrocidine, 171
— and **Dubos, René J.** The isolation of bactericidal substances from cultures of *Bacillus brevis*, 155
—. See *Lipmann, Hotchkiss, and Dubos*, 163
Hughes, James. See *Saifer, Hughes, and Scudero*, 495
Hutchings, B. L., Bohonos, N., and **Peterson, W. H.** Growth factors for bacteria. XIII. Purification and properties of an eluate factor required by certain lactic acid bacteria, 521

I

Irving, George W., Jr. See *Fruton, Irving, and Bergmann*, 763

J

Jacobs, Walter A., and **Craig, Lyman C.** The aconite alkaloids. VII. On staphisine, a new alkaloid from *Delphinium staphisagria*, 67
Jacobs, Walter A., Craig, Lyman C., and **Lavin, George I.** The veratrine alkaloids. XI. The dehydrogenation of jervine, 51
— and **Van Slyke, Donald D.** Phoebus Aaron Theodor Levene, 1
—. See *Craig and Jacobs*, 253
Jenrette, Wendell V. See *Greenstein, Jenrette, and White*, 327
Johnson, Marvin J. See *Gailey and Johnson*, 921

K

Kassell, Beatrice. See *Brand and Kassell*, 999
Katzenelbogen, E., Axelrod, A. E., and **Elvehjem, C. A.** The coenzyme I content of rat tissues in experimental hyperthyroidism, 611
Kennedy, Ethelmay. See *Ralli, Clarke, and Kennedy*, 105
Kline, B. E. See *Deutsch, Kline, and Rusch*, 529
Knight, C. A., and **Stanley, W. M.** Aromatic amino acids in strains of tobacco mosaic virus and in the related cucumber viruses 3 and 4, 39
— and —. Preparation and properties of cucumber virus 4, 29
Koenig, Virgil L., Melzer, Francisca, Szego, Clara M., and **Samuels, Leo T.** A colorimetric reaction for testosterone, 487
Kohn, Henry I. See *Harris and Kohn*, 989
Krantz, John C., Jr. See *Ellis and Krantz*, 147
Kratzer, F. H. See *Almquist, Mecchi, and Kratzer*, 365
Kuna, Martin. See *Levene and Kuna*, 391

L

Lavin, George I. See *Jacobs, Craig, and Lavin*, 51

LePage, G. A., and **Pett, L. B.** Absorption experiments with vitamin A, 747
Leva, Ernst, and **Rapoport, S.** A method for the determination of phytate phosphorus in blood, 343
Levene, P. A., and **Kuna, Martin.** Homologous series of α-substituted aliphatic acids, 391
Levy, Sylvia Ruth. See *Haven and Levy,* 417
Lipmann, Fritz, Hotchkiss, Rollin D., and **Dubos, René J.** The occurrence of *d*-amino acids in gramicidin and tyrocidine, 163

INDEX TO SUBJECTS

A

Acetone: Determination, microdiffusion, bisulfite reaction, *Winnick*, 115

Acetone body: Excretion, *dl*-lysine monohydrochloride effect, *Sharp and Berg*, 739

Acetyl derivative(s): Tobacco mosaic virus, *Miller and Stanley*, 905

Aconite: Alkaloids, *Jacobs and Craig*, 67

Adenine: Determination, *Hitchings and Fiske*, 827

Adenosine-5′-phosphoric acid: Determination, *Schlenk and Schlenk*, 311

Homologues, determination, *Schlenk and Schlenk*, 311

Adrenal(s): Lipids, fasting effect, *Oleson and Bloor*, 349

Alanine: *l*-, preparation, *d*-amino acid oxidase, use, *Behrens*, 465

Albumin: Blood serum, carbon suboxide-treated, ultracentrifugal behavior, *Oncley, Ross, and Tracy*, 797

— —, methionine absence, *Brand and Kassell*, 999

Alcohol(s): Sugar, *Ellis and Krantz*, 147

Aliphatic acid(s): α-Substituted, homologous series, *Levene and Kuna*, 391

Alkaloid(s): Aconite, *Jacobs and Craig*, 67

Veratrine, *Jacobs, Craig, and Lavin*, 51

Craig and Jacobs, 253

Amide(s): Bonds, proteins, hydrolysis, catalyzed, *Steinhardt*, 995

Amino acid(s): Aromatic, viruses, tobacco mosaic and cucumber, *Knight and Stanley*, 39

d-, gramicidin, *Lipmann, Hotchkiss, and Dubos*, 163

—, oxidase, *l*-alanine preparation, use, *Behrens*, 465

—, tyrocidine, *Lipmann, Hotchkiss, and Dubos*, 163

Free, carboxyl groups, determination, gasometric, *Van Slyke, Dillon, MacFadyen, and Hamilton*, 627

—, determination, carbon dioxide reaction with ninhydrin, titration, *Van Slyke, MacFadyen, and Hamilton*, 671

Apparatus: Urine steroids, extraction, *Hershberg and Wolfe*, 215

Arginine: Citrulline conversion, kidney, *Borsook and Dubnoff*, 717

Determination, micro-, *Dubnoff*, 711

Ascorbic acid: Phospholipid oxidation, effect, *Deutsch, Kline, and Rusch*, 529

Aspartic acid(s): Methyl-, methylation, *Dakin*, 945

B

Bacillus brevis: Cultures, bactericidal substances, isolation, *Hotchkiss and Dubos*, 155

Bacteria: Growth factors, *Hutchings, Bohonos, and Peterson*, 521

Bacteria—*continued:*
Lactic acid, growth factor, purification and properties, *Hutchings, Bohonos, and Peterson,* 521
Vitamin C determination, use in, *Gunsalus and Hand,* 853
Bactericidal substance(s): *Bacillus brevis* cultures, isolation, *Hotchkiss and Dubos,* 155
Biochemical reaction(s): Manometric diffusion, *Roughton,* 129
Biotin: Fat metabolism, effect, *Gavin and McHenry,* 619
— synthesis, effect, *Gavin and McHenry,* 619
Functional groups, *Hofmann, Melville, and du Vigneaud,* 207
Reagent effect, *Brown and du Vigneaud,* 85
Bisulfite reaction: Acetone determination, microdiffusion, *Winnick,* 115
Diffusion, micro-, methods, *Winnick,* 115
Blood: Glycolysis, sodium fluoride and sodium iodoacetate effect, *Bueding and Goldfarb,* 539
Lactic acid-pyruvic acid ratio, exercise effect, *Friedemann and Barborka,* 993
Phytate phosphorus determination, *Leva and Rapoport,* 343
Pyruvic acid, removal *in vitro*, *Bueding and Goodhart,* 931
Blood cell(s): Red, permeability, bromide, *Smith, Eisenman, and Winkler,* 555
—, —, chloride, radioactive, *Smith, Eisenman, and Winkler,* 555
—, —, iodide, *Smith, Eisenman, and Winkler,* 555
—, potassium, metabolism effect, *Harris,* 579
Blood plasma: Electrophoresis measurements, *Moore and Lynn,* 819
Blood serum: Albumin, carbon suboxide-treated, ultracentrifugal behavior, *Oncley, Ross, and Tracy,* 797
—, methionine absence, *Brand and Kassell,* 999
Brain: Glycolysis, *Ochoa,* 245
Phosphorus metabolism, radioactive phosphorus in study, *Fries and Chaikoff,* 479
Phosphorylation, *Ochoa,* 245
Bromide(s): Blood cell, red, permeability, *Smith, Eisenman, and Winkler,* 555

C

Calcium bicarbonate: Dissociation, *Greenwald,* 789
Calcium carbonate: Dissociation, *Greenwald,* 789
Carbohydrate(s): Tuberculins, properties, *Steenken,* 91
Carbon dioxide: *Trypanosoma lewisi*, glucose metabolism, rôle, *Searle and Reiner,* 563
Utilization, liver, *Evans and Slotin,* 439
Carbon suboxide: Blood serum albumin treated with, ultracentrifugal behavior, *Oncley, Ross, and Tracy,* 797
Proteins and, *Oncley, Ross, and Tracy,* 797
Carboxyl group(s): Amino acids, free, determination, gasometric, *Van Slyke, Dillon, MacFadyen, and Hamilton,* 627
Carcinogenic substance(s): Phospholipid oxidation, effect, *Deutsch, Kline, and Rusch,* 529
Catalase: Liver, activity, tumor-bearing rats, tumor extirpation effect, *Greenstein, Jenrette, and White,* 327
Cathepsin: Kidney, *Fruton, Irving, and Bergmann,* 763

Cathepsin—*continued:*
Spleen, *Fruton, Irving, and Bergmann,* 763
Cerebroside(s): Determination, *Brand and Sperry,* 545
Cevine: Oxidation, *Craig and Jacobs,* 253
Chloride(s): Biological fluids, determination, absorption indicators, *Saifer, Hughes, and Scudero,* 495
— —, —, micro-, eosin use, *Saifer, Hughes, and Scudero,* 495
Radioactive, blood cell, red, permeability, *Smith, Eisenman, and Winkler,* 555
Cholesterol: Autoxidation, colloidal aqueous solution, products formed, *Bergström and Wintersteiner,* 597
Citric acid: Muscle respiration, cycle, *Stare, Lipton, and Goldinger,* 981
Citrulline: Arginine, conversion, kidney, *Borsook and Dubnoff,* 717
Clostridium acidi-urici: Purine decomposition, *Barker and Beck,* 3
Clostridium cylindrosporum: Purine decomposition, *Barker and Beck,* 3
Coenzyme(s): Glyoxalase, *Behrens,* 503
I, tissue, hyperthyroidism, *Katzenelbogen, Axelrod, and Elvehjem,* 611
Creatine: Formation, chick, *Almquist, Mecchi, and Kratzer,* 365
Cucumber: Virus, amino acids, aromatic, *Knight and Stanley,* 39
—, preparation and properties, *Knight and Stanley,* 29
Cupric chloride: Crystallization, protein effect, *Morris and Morris,* 515
Cystine: Growth effect, *Womack and Rose,* 375
Synthesis *in vivo, Rose and Wood,* 381

D

Delphinium staphisagria: Staphisine, *Jacobs and Craig,* 67
Diatom: Lipids, *Clarke and Mazur,* 283
Diet: Glucose absorption, effect, *Sinclair and Fassina,* 509
Ketosis, fasting, liver fat and, relation, *MacKay, Carne, Wick, and Visscher,* 889
Diffusion: Biochemical reactions, manometric, *Roughton,* 129
N-(α, γ-Dihydroxy-β, β-dimethylbutyryl)taurine: Growth inhibition, pantothenic acid effect, *Snell,* 121
Dipeptidase(s): Intestine mucosa, *Gailey and Johnson,* 921
Diphosphothiamine: Reduction rate, *Barron and Lyman,* 951

E

Egg: *Urechis,* respiratory pigment, *Horowitz and Baumberger,* 407
Enzyme(s): Pasteur, yeast, absorption spectrum, *Melnick* 269
Proteolytic, kidney, *Fruton, Irving, and Bergmann,* 763
—, spleen, *Fruton, Irving, and Bergmann,* 763
—, tissue, *Fruton, Irving, and Bergmann,* 763
See also Catalase, Cathepsin, Coenzyme, Dipeptidase, Glyoxalase, Oxidase, Ribonuclease, Succinoxidase, Trypsin
Eosin: Biological fluids, chlorides, determination, micro-, *Saifer, Hughes, and Scudero,* 495
Estradiol: α-, fate, *Heard and Hoffman,* 329
—, metabolism, *Heard, Bauld, and Hoffman,* 709

Exercise: Blood lactic acid-pyruvic acid ratio, effect, *Friedemann and Barborka*, 993
Extractor: Urine steroids, *Hershberg and Wolfe*, 215

F

Fasting: Adrenal lipids, effect, *Oleson and Bloor*, 349
Ketosis, diet and liver fat, relation, *MacKay, Carne, Wick, and Visscher*, 889
Fat(s): Liver, fasting ketosis, diet relation, *MacKay, Carne, Wick, and Visscher*, 889
Metabolism, biotin effect, *Gavin and McHenry*, 619
Synthesis, biotin effect, *Gavin and McHenry*, 619
Fatty acid(s): Branched chain, ketogenic action, *Wick*, 897
Fish: Thiamine destruction by substance in, *Woolley*, 997

G

Glomerulus: Protein molecule passage, *Bott and Richards*, 291
Glucose: Absorption, diet effect, *Sinclair and Fassina*, 509
Metabolism, *Trypanosoma lewisi*, carbon dioxide rôle, *Searle and Reiner*, 563
Glycogen: Liver, *dl*-lysine monohydrochloride effect, *Sharp and Berg*, 739
Glycolysis: Blood, sodium fluoride and sodium iodoacetate effect, *Bueding and Goldfarb*, 539
Brain extracts, *Ochoa*, 245
Glyoxalase: Coenzymes, *Behrens*, 503
Gramicidin: *d*-Amino acids, *Lipmann, Hotchkiss, and Dubos*, 163
Chemical nature, *Hotchkiss*, 171
Composition, *Christensen, Edwards, and Pierama*, 187
Gramicidin—*continued:*
Properties, *Tishler, Stokes, Trenner, and Conn*, 197
Growth: Cystine effect, *Womack and Rose*, 375
N-(α, γ-Dihydroxy-β, β-dimethylbutyryl)taurine effect, *Snell*, 121
Factor, bacteria, *Hutchings, Bohonos, and Peterson*, 521
—, lactic acid bacteria, purification and properties, *Hutchings, Bohonos, and Peterson*, 521
Methionine effect, *Womack and Rose*, 375
Pantothenic acid effect, *Snell*, 121

H

Hydrogen: Transport, tissue, *Potter*, 775
Hydroxylysine: Proteins, determination, *Van Slyke, Hiller, and MacFadyen*, 681
Hyperthyroidism: Tissue coenzyme I, *Katzenelbogen, Axelrod, and Elvehjem*, 611

I

Insulin: Ketone body production, effect, *Somogyi*, 219
Lanthionine, *du Vigneaud, Brown, and Bonsnes*, 707
Intestine: Mucosa, dipeptidases, *Gailey and Johnson*, 921
Iodide(s): Blood cell, red, permeability, *Smith, Eisenman, and Winkler*, 555

J

Jervine: Dehydrogenation, *Jacobs, Craig, and Lavin*, 51

K

Ketogenic action: Fatty acids, branched chain, *Wick*, 897

Ketoglutarate: α-, metabolism, thiamine effect, *Barron, Goldinger, Lipton, and Lyman,* 975
Ketone body: Production, insulin effect, *Somogyi,* 219
Ketosis: Fasting, diet and liver fat, relation, *MacKay, Carne, Wick, and Visscher,* 889
Kidney: Cathepsin, *Fruton, Irving, and Bergmann,* 763
Citrulline conversion to arginine, *Borsook and Dubnoff,* 717
Enzymes, proteolytic, *Fruton, Irving, and Bergmann,* 763

L

Lactic acid: Bacteria, growth factor, purification and properties, *Hutchings, Bohonos, and Peterson,* 521
Blood, pyruvic acid and, exercise effect, *Friedemann and Barborka,* 993
Lanthionine: Insulin, *du Vigneaud, Brown, and Bonsnes,* 707
Levene, Phoebus Aaron Theodor: Obituary, *Jacobs and Van Slyke,* 1
Lipid(s): Adrenals, fasting effect, *Oleson and Bloor,* 349
Diatoms, *Clarke and Mazur,* 283
Phospho-. *See* Phospholipid
Liver: Carbon dioxide utilization, *Evans and Slotin,* 439
Catalase activity, tumor-bearing rats, tumor extirpation effect, *Greenstein, Jenrette, and White* 327
Fat, fasting ketosis, diet relation, *MacKay, Carne, Wick, and Visscher,* 889
Glycogen, *dl*-lysine monohydrochloride effect, *Sharp and Berg,* 739
Phospholipid metabolism, *in vitro,* radioactive phosphorus as indicator, *Fishler, Taurog, Perlman, and Chaikoff,* 809
Lysine: Hydroxy-, proteins, determination, *Van Slyke, Hiller, and MacFadyen,* 681
Lysine monohydrochloride: *dl*-, acetone body excretion, effect, *Sharp and Berg,* 739
—, liver glycogen, effect, *Sharp and Berg,* 739

M

Magnesium bicarbonate: Dissociation, *Greenwald,* 789
Magnesium carbonate: Dissociation, *Greenwald,* 789
Mannitol: Metabolism, *Ellis and Krantz,* 147
Toxicity, *Ellis and Krantz,* 147
Methionine: Blood serum albumin, absence, *Brand and Kassell,* 999
Derivatives, metabolism, tissue slices, *Borek and Waelsch,* 99
dl-, *dl*-methionine sulfone and methylsulfonium chloride replacement of, *Bennett,* 573
Growth effect, cystine relation, *Womack and Rose,* 375
Metabolism, tissue slices, *Borek and Waelsch,* 99
Spermatozoa, *Zittle and O'Dell,* 239
Test, colorimetric, *McCarthy and Sullivan,* 871
Methionine methylsulfonium chloride: *dl*-, *dl*-methionine replacement by, *Bennett,* 573
Methionine sulfone: *dl*-, *dl*-methionine replacement by, *Bennett,* 573
Methylaspartic acid(s): Methylation, *Dakin,* 945
Mosaic: Tobacco, virus, acetyl derivatives, *Miller and Stanley,* 905
—, —, amino acids, aromatic, *Knight and Stanley,* 39
—, —, derivatives, *Miller and Stanley,* 905
—, —, phenylureido derivatives, *Miller and Stanley,* 905

Muscle: Respiration, citric acid cycle, *Stare, Lipton, and Goldinger*, 981
See also Exercise

N

Nicotinic acid: Synthesis, body, *Dann*, 803

O

Obituary: Levene, Phoebus Aaron Theodor, *Jacobs and Van Slyke*, 1
Oxidase: *d*-Amino acid, *l*-alanine preparation, use, *Behrens*, 465
Succin-, system, *Potter*, 775
Oxidation(s): Biological, *Barron, and Lyman*, 951
Barron, Lyman, Lipton, and Goldinger, 957
Barron, Goldinger, Lipton, and Lyman, 975
Stare, Lipton, and Goldinger, 981

P

Pantothenic acid: Growth effect, *Snell*, 121
Pasteur enzyme: Yeast, absorption spectrum, *Melnick*, 269
Peptidase(s): Di-, intestine mucosa, *Gailey and Johnson*, 921
Peptide(s): Bonds, proteins, hydrolysis, catalyzed, *Steinhardt*, 995
Phenylureido derivative(s): Tobacco mosaic virus, *Miller and Stanley*, 905
Phospholipid(s): Liver, metabolism, *in vitro*, radioactive phosphorus as indicator, *Fishler, Taurog, Perlman, and Chaikoff*, 809
Oxidation, ascorbic acid and carcinogenic chemicals, effect, *Deutsch, Kline, and Rusch*, 529
Phosphorus: Brain, metabolism, radioactive phosphorus in study, *Fries and Chaikoff*, 479
Labeled, organs, recovery, *Fries and Chaikoff*, 469
Phosphorus—*continued:*
Radioactive, brain phosphorus metabolism, study with, *Fries and Chaikoff*, 479
—, liver phospholipid metabolism *in vitro*, study with, *Fishler, Taurog, Perlman, and Chaikoff*, 809
See also Phytate phosphorus
Phosphorylation: Brain extracts, *Ochoa*, 245
Phytate phosphorus: Blood, determination, *Leva and Rapoport*, 343
Pigment: Respiratory, *Urechis* eggs, *Horowitz and Baumberger*, 407
Potassium: Blood cells, red, metabolism effect, *Harris*, 579
Pregnancy: Urine, sodium pregnanediol glucuronidate, determination, titrimetric, *Allen and Viergiver*, 837
Progesterone: Metabolism, *Heard, Bauld, and Hoffman*, 709
Protein(s): Amide bonds, hydrolysis, catalysis, *Steinhardt*, 995
Carbon suboxide and, *Oncley, Ross, and Tracy*, 797
Cupric chloride crystallization, effect, *Morris and Morris*, 515
Derivatives, purified, tuberculins, properties, *Steenken*, 91
Hydroxylysine determination, *Van Slyke, Hiller, and MacFadyen*, 681
Molecules, glomerular membranes, passage, *Bott and Richards*, 291
Peptide bonds, hydrolysis, catalysis, *Steinhardt*, 995
Proteolysis: Enzymes, kidney, *Fruton, Irving, and Bergmann*, 763
—, spleen, *Fruton, Irving, and Bergmann*, 763
—, tissue, *Fruton, Irving, and Bergmann*, 763
Purine(s): Decomposition, *Clostridium acidi-urici* and *Clostridium cylindrosporum*, *Barker and Beck*, 3

Purine(s)—*continued:*
Sulfonamide action, effect, *Harris and Kohn*, 989
Pyruvate: Condensation reactions, thiamine effect, *Barron, Lyman, Lipton, and Goldinger*, 957
Pyruvic acid: Blood, lactic acid and, exercise effect, *Friedemann and Barborka*, 993
—, removal *in vitro*, *Bueding and Goodhart*, 931

R

Respiratory ferment: Yeast, absorption spectrum, *Melnick*, 269
Respiratory pigment: *Urechis* eggs, *Horowitz and Baumberger*, 407
Riboflavin: Biological fluids, determination, fluorometric, *Najjar*, 355
Determination, microbiological, *Scott, Randall, and Hessel*, 325
Urine, determination, fluorometric, *Najjar*, 355
Ribonuclease: Crystalline, absorption spectrum, *Uber and Ells*, 229

S

Selenium: Radio-, sodium selenate distribution and excretion, study with, *McConnell*, 427
Sodium chloride: Levels, vitamin B filtrate factors, deficiency, administration effect, *Ralli, Clarke, and Kennedy*, 105
Vitamin B filtrate factors, deficiency, administration effect, *Ralli, Clarke, and Kennedy*, 105
Sodium fluoride: Blood glycolysis, effect, *Bueding and Goldfarb*, 539
Sodium iodoacetate: Blood glycolysis, effect, *Bueding and Goldfarb*, 539
Sodium pregnanediol glucuronidate: Urine, pregnancy, determination, titrimetric, *Allen and Viergiver*, 837
Sodium selenate: Body distribution and excretion, radioselenium in study, *McConnell*, 427
Sorbitol: Metabolism, *Ellis and Krantz*, 147
Toxicity, *Ellis and Krantz*, 147
Spermatozoa: Methionine, *Zittle and O'Dell*, 239
Sphingomyelin: Tumor, metabolism, *Haven and Levy*, 417
Spleen: Cathepsin, *Fruton, Irving, and Bergmann*, 763
Enzymes, proteolytic, *Fruton, Irving, and Bergmann*, 763
Staphisine: *Jacobs and Craig*, 67
Steroid(s): *Heard and Hoffman*, 329
Heard, Bauld, and Hoffman, 709
Urine, extraction apparatus, *Hershberg and Wolfe*, 215
Sterol(s): Autoxidation, colloidal aqueous solution, *Bergström and Wintersteiner*, 597
Succinoxidase: System, *Potter*, 775
Sugar: Alcohols, *Ellis and Krantz*, 147
Sulfonamide(s): Purine effect, *Harris and Kohn*, 989

T

Taurine: N-(α,γ-Dihydroxy-β,β-dimethylbutyryl)-, growth inhibition, pantothenic acid effect, *Snell*, 121
Testosterone: Color reaction, *Koenig, Melzer, Szego, and Samuels*, 487
Thiamine: Destruction, fish effect, *Woolley*, 997
Diphospho-, reduction rate, *Barron and Lyman*, 951
α-Ketoglutarate metabolism, effect, *Barron, Goldinger, Lipton, and Lyman*, 975
Pyruvate condensation reactions, effect, *Barron, Lyman, Lipton, and Goldinger*, 957
Reduction rate, *Barron and Lyman*, 951

Thiamine—*continued:*
Urine, determination, *Egaña and Meiklejohn*, 859
Thyroid: *See also* Hyperthyroidism
Tobacco: Mosaic virus, acetyl derivatives, *Miller and Stanley*, 905
— —, amino acids, aromatic, *Knight and Stanley*, 39
— —, derivatives, *Miller and Stanley*, 905
— —, phenylureido derivatives, *Miller and Stanley*, 905
Trypanosoma lewisi: Glucose metabolism, carbon dioxide rôle, *Searle and Reiner*, 563
Trypsin: Crystalline, inactivation, photochemical, *Uber and McLaren*, 231
Tuberculin: Carbohydrates, properties, *Steenken*, 91
Protein derivatives, purified, properties, *Steenken*, 91
Tumor: -Bearing rats, liver catalase activity, tumor extirpation effect, *Greenstein, Jenrette, and White*, 327
Sphingomyelin metabolism, *Haven and Levy*, 417
Tyrocidine: *d*-Amino acids, *Lipmann, Hotchkiss, and Dubos*, 163
Chemical nature, *Hotchkiss*, 171
Composition, *Christensen, Edwards, and Piersma*, 187
Tyrosine: *l*-, phenolic hydroxyl group activity, factors affecting, *Bowman*, 877

U

Urechis: Eggs, respiratory pigment, *Horowitz and Baumberger*, 407
Urine: Acetone body excretion, *dl*-lysine monohydrochloride effect, *Sharp and Berg*, 739
Pregnancy, sodium pregnanediol glucuronidate, determination, titrimetric, *Allen and Viergiver*, 837
Urine—*continued:*
Riboflavin determination, fluorometric, *Najjar*, 355
Steroids, extraction apparatus, *Hershberg and Wolfe*, 215
Thiamine determination, *Egaña and Meiklejohn*, 859

V

Veratrine: Alkaloids, *Jacobs, Craig, and Lavin*, 51
Craig and Jacobs, 253
Virus: Cucumber, amino acids, aromatic, *Knight and Stanley*, 39
—, preparation and properties, *Knight and Stanley*, 29
Tobacco mosaic, acetyl derivatives, *Miller and Stanley*, 905
— —, amino acids, aromatic, *Knight and Stanley*, 39
— —, derivatives, *Miller and Stanley*, 905
— —, phenylureido derivatives, *Miller and Stanley*, 905
Vitamin(s): A, absorption experiments, *Le Page and Pett*, 747
—, non-crystallizable, *Baxter, Harris, Hickman, and Robeson*, 991
B, filtrate factors, deficiency, sodium chloride administration effect, *Ralli, Clarke, and Kennedy*, 105
—, — —, —, sodium chloride levels, *Ralli, Clarke, and Kennedy*, 105
C, determination, bacteria for, *Gunsalus and Hand*, 853
K, determination, colorimetric oxidation-reduction, *Scudi and Buhs*, 451

W

Worm: Marine. *See Urechis*

Y

Yeast: Pasteur enzyme, absorption spectrum, *Melnick*, 269
Respiratory ferment, absorption spectrum, *Melnick*, 269
